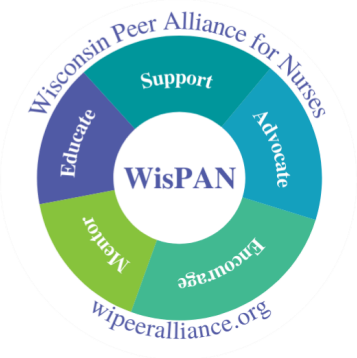
Wisconsin Peer Alliance for Nurses



PARTNER WITH WisPAN

Build a culture of trusted, confidential support for your frontline nursing team

The Problem:

- The average cost to replace a single departing RN is $60,000.
- Standard EAPs are often underutilized due to professional stigma and fear of licensing repercussions.
- WisPAN is the independent, external ally that provides psychological safety.

Partnership Tiers:

1. Foundational Resource Partner (Digital resource integration & EAP alignment)
2. Active Collaborative Partner (Live educational workshops for frontline staff & leadership)
3. Premium Champion Partner (Full system policy consultation, & joint wellness events)

Our Pillars:

- Direct referral pathways to free, anonymous, weekly virtual support meetings run by nurses, for nurses.
- Curated wellness toolkits easily embedded directly onto your hospital intranet or nurse portals.
- Targeted workshops, Grand Rounds, and leadership training designed to replace current frameworks with supportive pathways.

Your Next Step

- Schedule a brief, 15-minute introductory call to explore how we can tailor our peer-led model to your organization's wellness goals.
